-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 6) ☐ Other: ____.

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-13 in the reply filed on 1/11/05 is acknowledged.
2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 112

1. Claims 10-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.
 - a. Claim 10 states that pressure releases the dies; however, the specification states that the dies have to be cut with a laser first and then the pressure can release them.
 - b. The die picker is not shown in the drawing and does not appear to be part of the invented device. Claim 13 is not enabled by the disclosure.

Art Unit: 3723

1. Claims 10-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. Claim 10 states that pressure releases the dies; however, the specification states that the dies have to be cut with a laser first and then the pressure can release them.

b. In claim 12 what pierces the flexible wafer support? This method step must clearly recite the structure because this step is not evident from the drawings.

c. Claim 13 recites a die picker but this does not appear to be part of structure of the support system.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Togawa et al (6852019).

Togawa et al teach a method having a wafer support system (1), a vacuum chamber (22&25) which are at a lower pressure (col.13, lines 1-10), temperature control of first and second environments (col.10, lines 45-50), a perforated surface (figs.2&3)

4. Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Nonaka (6012509).

Nonaka teaches a method having a wafer support system (100), a vacuum chamber (106) which are at a lower pressure (col.7, lines 25-30), temperature control of first (102)and second environments (112 this is colder than the first temperature of at 102), a perforated surface (122), a flexible surface (110).

In regard to claims 10-13, the art is applied as best understood because applicant has recited parts that do not appear to be part of the invention the prior art is read on the claims with the same indefiniteness as the claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yadav et al and Sherstinsky et al disclose a device.
